## COMPANY INFORMATION

THE «TRAPEZA» TRADEMARK HAS BEEN KNOWN ON THE MARKET SINCE 1998.

THE FOLLOWING IS PRODUCED UNDER THIS TRADEMARK:

- traditional spices – from black pepper to turmeric
- condiments for different dishes
- coating mixes for meat, fish and poultry
- cooking additives and spices such as citric acid and starch
- natural kissels for instant cooking with a variety of fruity and berry tastes, jelly
- mixes for making sauces/gravies/marinades
- baking mixes and dry desserts – creams, impregnations
- meal makers, which are ready-made mixes for cooking
- ice cream mixes
- soup mixes

The products are manufactured by the Novosibirsk Food Processing Plant. Within 20 years, it became well known all over Russia, as well as near and far abroad.

### HOW DID WE ACHIEVE THIS?

- Since 2007, Novosibirsk Food Processing Plant has been certified according to international standards: ISO 9001 quality and ISO 22000 food safety, which is a development of the HACCP system. We are one of the first Russian enterprises to receive ISO 22000:2005 certificate. In 2016, NFPP passed the third recertification for compliance with the requirements of the international Food Safety System Certification FSSC 22000 (certificate RU18/818418824). The level of product safety allows producing Privat Label products for leading networks.

*The «Trapeza» was awarded with numerous prizes of international and regional exhibitions due to its quality. In 2004, spices of «Trapeza» were awarded the sign «100 best goods of Russia», and in 2005, kissels of «Trapeza» were awarded with this honor.*

- The modern infrastructure has been created at the plant, which allows us to speak with confidence about the world level of the production environment in terms of hygiene and safety of food production, as well as in terms of ecology, ergonomics and comfort. The plant is located in an environmentally clean suburb of Novosibirsk. Energy-saving and advanced technologies have significantly reduced operating costs and optimized the cost of products, which certainly affects the price of the final product. The requirements of GMP (good manufacturing practices) and HACCP commonly accepted in the world for food production laid the foundation and benchmarks for the establishment of the plant and were successfully implemented.

- Special attention is paid to the selection and storage of raw materials, which means careful selection of suppliers, strict incoming control, quarantine zones and allocated storage. Our warehouse complex ensures the compliance with the necessary conditions of storage of both raw materials and finished packaged products, which are constant temperature and humidity, absence of pests and cross-contamination. Ecological loading and unloading equipment optimizes all operations at the warehouse and treats raw materials carefully. The spices preserve all their flavor.

- Laboratory incoming control allows obtaining high-quality raw materials and finished products that meet all standards at the stages of production and output.

- The in-house technological laboratory promptly tests new products, which accelerates the process of developing new lines. The leading Russian food technologists developed the recipes of spices, which passed long-term testing. The tasting sessions were conducted among different groups of consumers, which makes it possible to take into account different tastes and preferences. The preliminary search for competitive advantages leads to the creation of a product with unique properties.

Launch of new product lines allows keeping up the constant interest of the customer. This is how a product, which meets the needs of customers to the greatest possible extent, is born.

We chose a strategic line of natural products, within the framework of which we offered condiments without additives and salt in 2000. The customer does not overpay for salt and spices of dubious quality with glutamate. We believe that the natural products are the future of consumer choice.

- The package design is constantly updated. In 2011, the trademark «Trapeza» was rebranded and the following appeared: brand for spices and condiments «Trapeza – vo glave stola», brand «Trapeza» for kissels, jellies and sweet dishes, and brand for professional cookery «Trapeza PRO». In 2012, a new brand «Vokrug sveta» for a new group of premium condiments united by the idea of culinary journeys to countries and cuisines of the world was born. In 2014, new products for baking under the brand name «Recepty vkusa» were launched. In 2015, along with the creation of a new series of meal makers, a new brand called «Trapeza na vtoreoe» was established.

In 2017-2018, lines of spices, condiments and cooking additives were redesigned. In 2020, a new brand «Trapeza na pervoe» appeared when creating a line of soups.

- Raw materials are additionally cleaned from impurities, sieved, calibrated and packaged. The use of high-tech Italian equipment allows reducing production costs and the possibility of product contamination to a minimum, while maintaining the quality of ingredients. Reliability of the equipment ensures high packaging speed and smooth operation of the lines.

- Each product pack contains recommendations for use and a recipe. Customers can call the number specified on the package or write to the quality department, where all suggestions and comments of customers are analyzed. Traceability procedure allows for prompt investigation of each claim.

- The developed network of distributors ensures efficient sales in the greater part of Russia. Our trademark becomes a guarantee of quality and optimal price for the consumer and retail network. Leading store networks present an assortment of spices and condiments of «Trapeza». According to the results of 2012, «Trapeza» was given the title of «The best regional supplier of METRO Cash & Carry» – METRO Quality Award.

Since 2017, the plant has been producing condiments, spices and cooking additives under the Private label for several federal networks.

### The advantages of «Trapeza» are:

- stable volume and quality of products
- best compromise between quality and price
- attention to every customer and end user
- innovations
- high yield for all sales channels

- The network of fast food restaurants was actively involved in creating new flavors with the help of our condiments. For these restaurants, we have developed a special series called «Professional cookery», which are products in ergonomic packaging with convenient dispensers. Customers liked the jars so much that they willingly buy them in stores.

- Our specialists will help you to form an optimal assortment, select retail equipment, offer promotions to support sales, train your sales representatives.

Bar-code: 4605209007391

TRAPEZA marinade is an original dry mix of spices for quick and delicate marinating of meat for barbecue, grill or roast. The meat is marinated quickly and fried smoothly. It retains its juiciness better and gets a delicious crispy crust. The marinade is evenly stirred with water and vegetable oil, poured over the meat and put in the cold for 1-2 hours. Further, cook it on fire, in a frying pan or in the oven.

## Bake!

«Recepty vkusa» biscuits are an excellent basis for creating a wide range of cakes and desserts.

## Impregnate!

«Recepty vkusa» cake impregnations give an original flavor and aroma to your confectionery masterpiece and make the cake crusts more tender and soft. The «Irish Cream» impregnation is the flavor of the Irish cream liqueur «Balis», and the «Rum» impregnation is the flavor of Cuban rum «Havana Club».

IMPORTANT: «Recepty vkusa» dry desserts for making impregnations for cakes do not contain alcohol.

## Decorate!

Cake creams «Recepty vkusa» are made of unique ingredients of the highest quality. They have an intense taste and excellent consistency and are very easy to prepare and use.

*Create your culinary masterpieces easily and quickly!*

### NATURAL INSTANT COOKING KISSELS WITH THE ADDITION OF OMEGA-3 FATTY ACIDS (PORTIONED)

Today, kissel has become a high-tech product. Having preserved its naturalness and usefulness, it is now a real alternative to office coffee and tea, which is not inferior in ease of use and is ahead of them in terms of nutrition and dietary properties:

- **Unique formula** – it contains only natural ingredients, pieces of sublimated berries or fruits.
- **The product of instant cooking** – it does not require cooking, just add hot (not less than 85 °C) water from the kettle or cooler, stir and wait 1-2 minutes.
- **Convenient portioned package** – one pack per cup.
- **A balanced range of tastes** – only the most popular flavors.
- **Health benefits** – it contains flour made of seeds of the Mexican plant chia, which is a unique natural plant source of Omega-3 fatty acids, the consumption of which helps to strengthen the nervous, immune and cardiovascular systems.

**Strawberry Kissel**  
Weight: 20 g  
Storage period: 18 month

SERIES FOR PROFESSIONALS – «TRAPEZA PRO»

The «Professional cookery» series was developed for restaurants, cafes, canteens, as well as for those customers who find it more convenient to keep spices and condiments in large jars. The jar is plastic, light and transparent, it does not break, has a shape that is comfortable for the hand, occupies an optimal place on the kitchen shelf, and is equipped with a dispensing lid. Dispenser has two positions for coarse and fine particles. The neck of the jar is sealed with foil, that is why moisture does not get inside during storage. The volume of a 0.5-liter jar is selected so that the contents, on the one hand, are enough for several times, and, on the other, the humid kitchen air does not have time to spoil the quality of the product. Chefs of restaurants and cafes have appreciated the advantages of such a jar, because it is easy, convenient and quick to use it when every minute counts!

**Edible Sea Salt**  
Weight: 600 g
